

SnapCubicle™
by Drapery Industries®

It's a Snap!

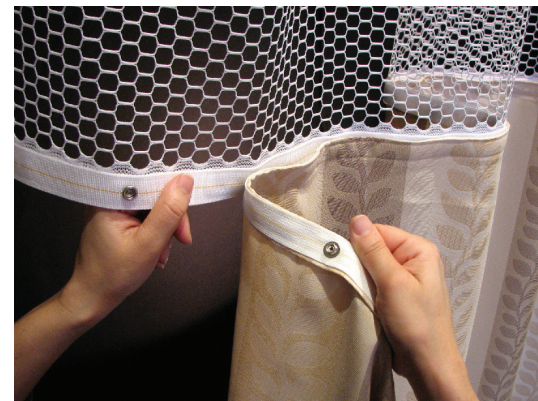

The SnapCubicle™ system makes changing privacy curtains quicker and easier than ever before. This two-part curtain consists of a mesh header and a standard length fabric panel that snap together. Peel away the fabric for laundering, and the mesh stays on the track.

SnapCubicle™ Benefits

Convenience

Remove curtains quickly without the need for ladders, step-stools or tools. The snaps allow housekeeping staff to replace curtains easily while standing on the floor. There is no need to remove the mesh headers from the track when changing the fabric panels.

Cost Savings

The two-part system means you buy only the components you need. Order replacement panels and mesh headers separately, instead of purchasing entire new curtains.

Durability

The nylon-framed mesh heading and double-stitch construction make the SnapCubicle™ system the most durable curtain you can buy.

Easy Inventory

All fabric panels are the same height. Just grab a clean curtain and go.

Laundry

Removing and replacing the SnapCubicle™ curtain is so quick and easy, that you can save time and increase the frequency of cleaning.
