

A hand is shown holding a long, thin, silver metal rod. The rod has a white section at the top and a black cap at the bottom. The background is a light-colored fabric with a subtle, repeating pattern of orange and brown swirls. The text 'SafeGrip™' is printed in a large, serif font in the upper right quadrant. Below it, in a smaller, sans-serif font, is the text 'with CuVerro® bactericidal copper'. Further down, in a similar font, is 'by Drapery Industries®'.

that cause various Healthcare-Associated Infections (HAI)**

Introducing SafeGrip™ Wands

for SnapCubicle™ with *CuVerro® antimicrobial copper!*

Copper is Critical | An important new weapon in the fight against infectious bacteria

Effective

With up to 80% of HAI spread by touch, surface hygiene is a growing concern in healthcare environments. SnapCubicle SafeGrip™ wands feature EPA registered CuVerro® Bactericidal Copper Surfaces, that, when cleaned regularly, deliver continuous and ongoing antibacterial action, killing greater than 99.9% of bacteria* within 2 hours, including MRSA.

Broad Spectrum

Drapery Industries manufactures SafeGrip™ wands, the only cubicle curtain baton with CuVerro® antimicrobial bactericidal copper surface that kills the following bacteria: *Staphylococcus aureus, Enterobacter aerogenes, Methicillin-Resistant Staphylococcus aureus (MRSA), Escherichia coli O157:H7, Vancomycin-Resistant enterococci (VRE), and Pseudomonas aeruginosa.

Continuous Protection

Unlike sprays and hand washing, CuVerro® surfaces continuously kill 99% of HAI-causing bacteria. Think of it as an additional weapon in the fight against bacteria that cause some Healthcare Associated Infections (HAI).

What is CuVerro®? (<http://cuverro.com/benefits/healthcare/professionals>)

CuVerro is a class of touch surface material designed specifically for areas where cleanliness is a concern. It is the only solid touch surface material that is allowed to make public health claims in the US.

CuVerro copper alloys' inherent bactericidal properties are unsurpassed and represent the first (solid surface) class of EPA-registered materials that actively kill bacteria* continuously, 24 hours a day. It works by killing greater than 99.9% of bacteria, including MRSA, within 2 hours, helping to inhibit buildup and growth of bacteria* between routine cleaning and sanitizing steps.

Use and cleaning instructions for SnapCubicle SafeGrip wands:

The use of SnapCubicle SafeGrip and CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission (D-0001-1506)
